<p>Surewicz, W., Olszewski, and Modrzejewski, K. DEGREE OF COOKING AND EVALUATION OF KRAFT PULPS. [1961] [10]p. Order from SLA \$1.10</p> <p>Trans. of Zellstoff und Papier (Germany) 1961, v. 10, no. 9, p. 329-334.</p> <p>DESCRIPTORS: *Wood pulp, Processing, Mechanical properties, Paper industry.</p> <p>Tests showed that degree of cooking is a satisfactory criterion for Kraft pulps both in regard to pulp yield and other properties which are significant for addi- tional processing. The general character of correla- tions between pulp yield, pulp strength and degree of cooking of Kraft pulps is similar for pulps made at different cooking conditions (maximum temperature, alkalinity, sulphidity). Maximum screened pulp yields were obtained at Oestrand numbers 65 to 60 (73). (Materials--Wood, TT, v. 8, no. 1) (over)</p>	<p>62-14254</p> <p>1. Title: Kraft cooking I. Surewicz, W. II. Olszewski III. Modrzejewski, K.</p> <p>Office of Technical Services</p>
